THE CAMPAIGN OF HALABJA AND ANFAL

Those who are responsible for the chemical massacre of more than 5,000 Kurds in Halabja and the genocides of more than 182,000 Kurds during "Anfal" operations in 1988 by the Iraqi regime must be brought to justice as criminals against humanity.

By standing against using chemical weapons, I condemn these crimes and their criminals, and I demand justice. The halabja and anfal crimes have to be recognized as genocides against humanity by the UN and the world governments.
